Super energy-efficient

with brilliant performance

The eco-friendly Philips 24" monitor is designed for sustainable productivity. Super energy efficient design delivers a new level of power savings. PowerSensor and LightSensor further reduce energy use while delivering crisp visuals.

Energy efficiency - Eco-conscious power savings

- Super energy efficient design for maximum power savings
- PowerSensor saves up to 80% energy costs
- LightSensor for the perfect brightness with minimal power
- Zero power consumption with 0 watt hard switch

Eco-friendly materials for sustainability

- Eco-friendly materials meet major international standards
- 100% Recycled packing material
- Halogen-free design to minimize environmental impact

Brilliant performance

- IPS technology for full colors and wide viewing angles
- LowBlue Mode for easy on-the-eyes productivity

Designed for comfortable productivity

- TUV Eye Comfort certified to reduce eye fatigue

PHILIPS

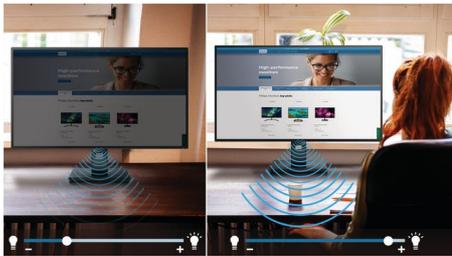

Highlights

Super energy efficient design

Using new energy saving design with a super-efficient power supply, this monitor achieves a higher energy class, while giving excellent performance. Power efficient feature uses a new LED backlight technology which maintains brightness and color using significantly less energy; makes a big difference when using many monitors or even just one.

PowerSensor

PowerSensor is a built-in 'people sensor' that transmits and receives harmless infrared signals to determine if user is present and automatically reduces monitor brightness when user steps away from the desk, cutting energy costs by up to 80 percent and prolonging monitor life

LightSensor

LightSensor uses a smart sensor to adjust the picture brightness depending on the room light

conditions for the perfect picture with minimal power usage.

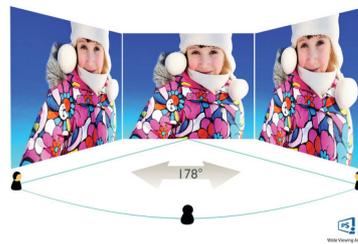

Zero power consumption

At the flick of the 0 watt hard switch which is conveniently located at the back, you can completely cut-off your monitor from AC power. This results in zero power consumption reducing your carbon footprint even further

Eco-friendly materials

Philips is committed to use sustainable, eco-friendly materials across its monitor range. All body plastic parts, metal chassis parts and packing materials use 100% recyclable materials. In selected models we utilize up to 85% post-consumer recycled plastics. Strict adherence to RoHS standards ensures substantial reduction or elimination of toxic substances, like Lead and Mercury have been eliminated in monitors with LED backlight completely.

IPS technology

IPS displays use an advanced technology which gives you extra wide viewing angles of 178/178 degree, making it possible to view the display from almost any angle - even in 90 degree Pivot mode! Unlike standard TN panels, IPS displays gives you remarkably crisp images with vivid

colors, making it ideal not only for Photos, movies and web browsing, but also for professional applications which demand color accuracy and consistent brightness at all times.

LowBlue Mode

Studies have shown that just as ultra-violet rays can cause eye damage, shortwave length blue light rays from LED displays can cause eye damage and affect vision over time. Developed for wellbeing, Philips LowBlue Mode setting uses a smart software technology to reduce harmful shortwave blue light.

TUV Rheinland Eye Comfort

Philips display meet TUV Rheinland Eye Comfort standard to prevent eye strain caused by prolonged computer use. With TUV Eye Comfort certification, Philips displays ensure flicker-free, low blue mode, no disturbing reflections, wide viewing angle and less reduction of image quality from different angles and ergonomic stand designs for ideal viewing experience. Keep your eyes healthy and boost work productivity.
